Excerpt: .as when a declining fatality corresponds with an increasing number of reported cases. The State Sanitary Code does not apply to New York City; the latter's Sanitary Code should be referred to for exact list of City's reportable diseases. This title includes only the disease named, not all that are classifiable under the International list number given. Rates per 20,222 population Per annum except fatality which is the ratio of deaths Per 20 reported cases. Chiefly because of small numbers involved some rates are omitted. Case fatality must be interpreted with much caution, as incomplete reporting of cases increases the rate: also the deaths may not be those of cases reported in the same month. Nevertheless, the trend of fatality is often significant, as when a declining fatality corresponds with an increasing number of reported cases. The State Sanitary Code does not apply...
