Not illustrated. 1770 Excerpt: .studies and fatigues of his profession; they render his conversation more chearful and entertaining; and, instead of that aukward pedantry, which modern men of learning have generally chosen to distinguish themselves, they diffuse a liberal, ingenuous, and elegant air over his whole manners. LECTURE IL I. H E works of nature are of inJL sinite extent and variety: but amidst all this variety, there is such an intimate connection, that no one part can be thoroughly understood by studying it entirely detached from the rest. In our enquiries into the various branches of the works of nature, there are certain general views, and certain general principles of investigation, to be particularly attended to. The general views to be attended to, in the study of nature, respect, I. The advantages it brings to individuals, a. Public utility. I. The advantages to individuals, that attend enquiries into nature,...
